

Design System v2.4.0

TransitOps Clarity

A refined enterprise visual language engineered for mission-critical fleet management. Combining high-contrast readability with an approachable light-mode aesthetic to reduce cognitive load for 24/7 operations teams.

Color Palette

Our semantic palette uses high-contrast accessibility standards to ensure critical fleet alerts are immediately identifiable.

Deep Blue

--PRIMARY • #1E90FF

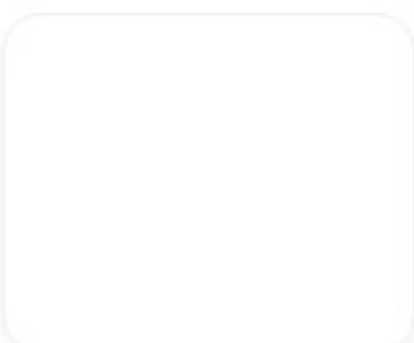

Used for primary actions, active navigation, and branding.

Teal Accent

--BRAND2ND • #148BA6

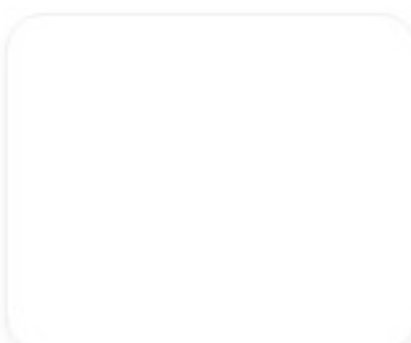

Support brand color for secondary indicators and badges.

Safe Green

--SUCCESS • #22C55E

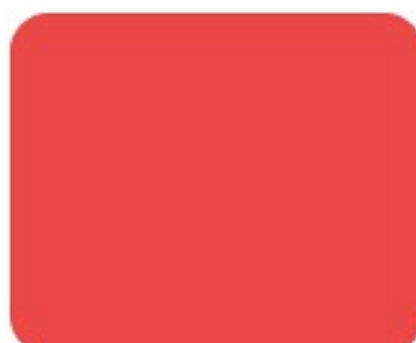

Indicates 'On Trip', 'Optimal', or 'Completed' status.

Attention Amber

--WARNING • #F5BEDB

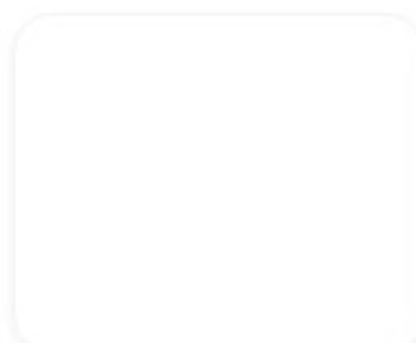

Used for low fuel, minor delays, or pending maintenance.

Critical Coral

--DESTRUCTIVE • #EF4444

High-priority alerts, breakdowns, or overdue inspections.

Soft White

--BACKGROUND • #FFFFFF

The primary canvas. Clean, neutral, and high-contrast.

Typography

We employ a dual-font strategy: Inter for conversational UI elements and JetBrains Mono for precise telemetry and numeric data.

Inter UI Interface Font

The quick brown fox jumps over the lazy dog

Modern, readable sans-serif optimized for screens and interface hierarchy.

JetBrains Mono Telemetry Font

102.4 KM/H | 45.2891°N

Monospaced font for tabular data, mileage, and GPS coordinates.

Strategic Fleet Operations

HEADING 1
text-dxl • font-extrabold

Real-time telemetry and predictive logistics

SUB HEADING
text-xl • font-semibold

The fleet management dashboard provides comprehensive visibility into your transit network.

BODY TEXT
text-base • font-normal

DATA POINT
text-lg • font-medium

VIN: 2HGB65839 • ODO: 42,912.4

Elevation & Depth

Clarity uses a multi-layered shadow system to define hierarchy and emphasize focus areas without visual clutter.

Shadow SM (Default Cards)

Standard data containers

Shadow MD (Hover State)

Interactive surface lift

Shadow LG (Primary Focus)

Hero elements & CTAs

Glassmorphism

Subtle blur for overlays

Component Gallery

Standardized UI primitives built with TransitOps Clarity tokens.

Alex Rivera

System Architect

"Design systems are about speed. We built TransitOps Clarity to ensure that fleet managers can make decisions in seconds, not minutes."

Why "Clarity"?

Reduced Alert Fatigue

Strategic use of warning glows ensures that only critical issues break the visual calm of the light theme.

Accessible Enterprise

Contrast ratios exceeding WCAG AA 4.5:1 across all semantic states, even in the soft light mode.

Technical Precision

JetBrains Mono integration ensures that no digit is misread during rapid scanning of fuel or odometers.
